School of Coding)

## **OVERVIEW**

Online Tourism Management System is an integrated web-based software developed for tour operating companies. The main aim of this project is to help the tourism companies to manage their customers, hotels, vehicles, and agents. It makes all operations of the tour company easy and accurate. Tourism can be domestic or international, and international tourism has both incoming and outgoing implications on a country's balance of payments. Today, tourism is a major source of income for many countries, and affects the economy of both the source and host countries, in some cases being of vital importance.

### **Software Requirements:**

Front end : (Servlet, JSP), HTML, CSS, Bootstrap, JDBC.

Back end : Java/J2EE technologies.

Server : ApacheTomcatv8.0V

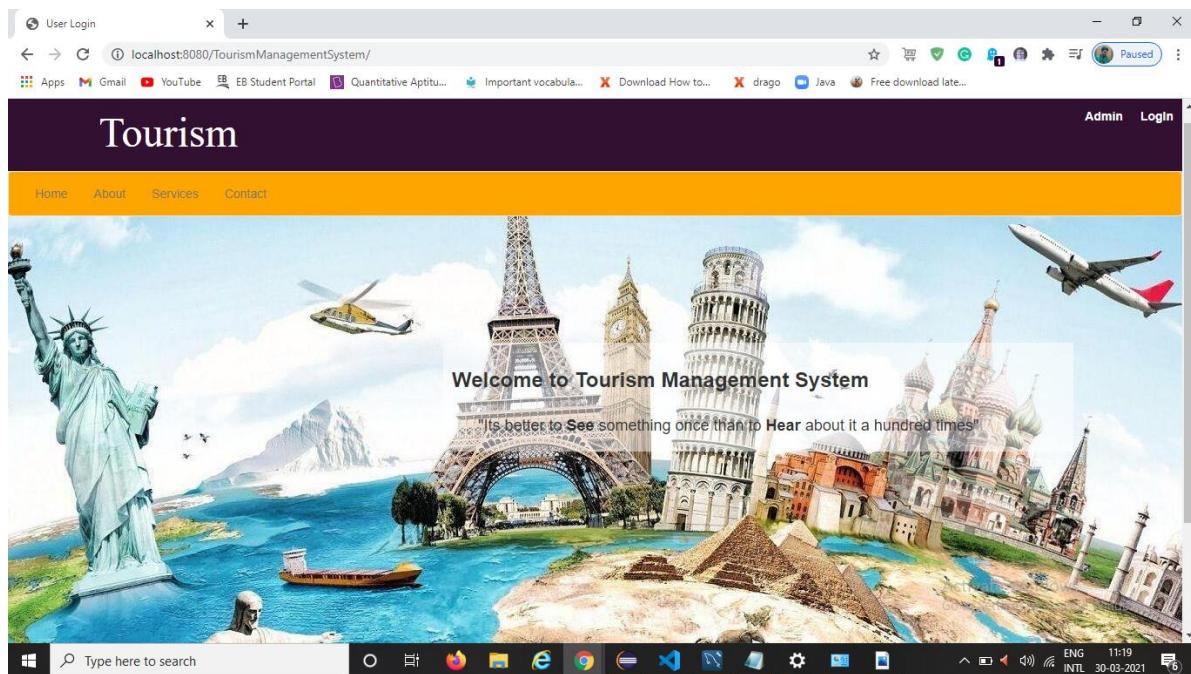

ID : Eclipse IDE for Java EE Developers

Browser : Best result on Google chrome.

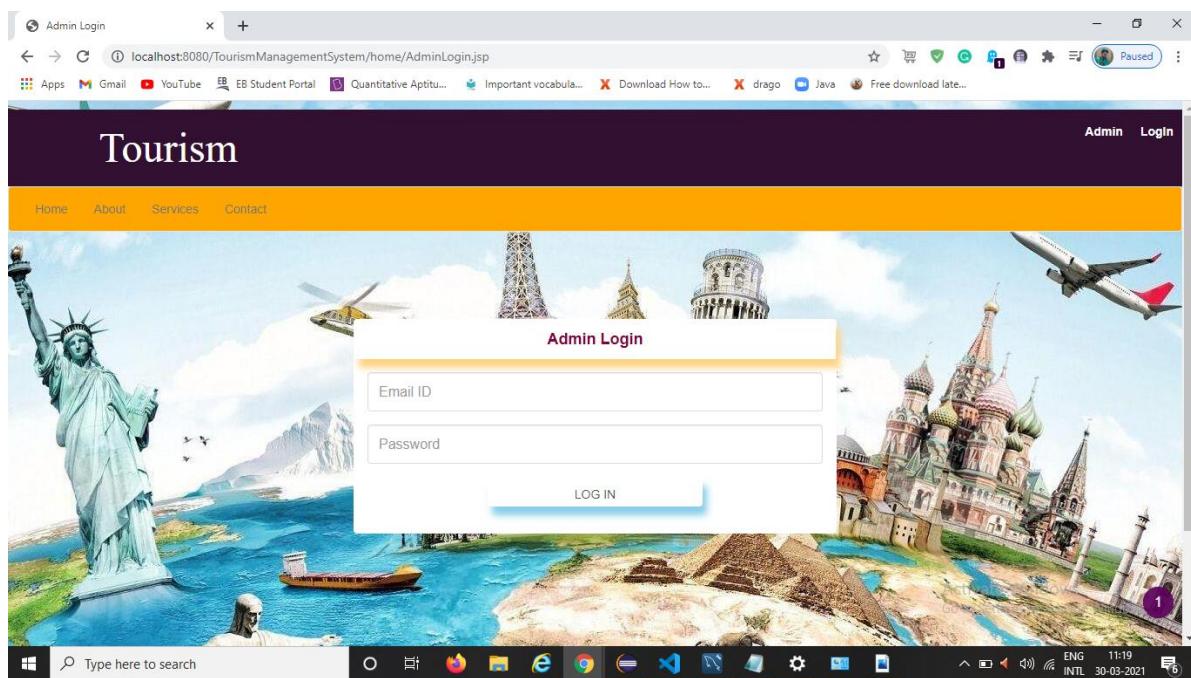

Operating System : Window 10.

Operating System : Window 10.

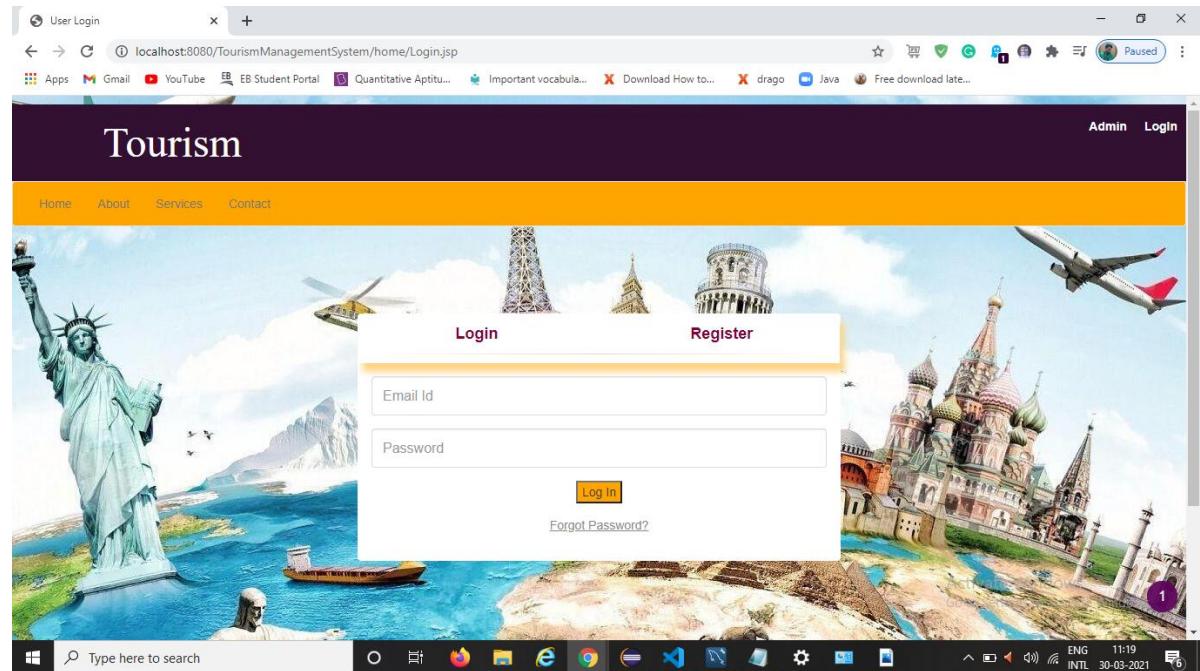

## Step 1: URL (<https://localhost:8080/TourismManagementSystem>)
